PREFACE

CATALOGUE "B."

WE take pleasure in presenting Catalogue "B," devoted exclusively to Porcelain Plumbing Goods, consisting of 122 pages, containing 60 pages more than catalogue previously issued.

The enlarged size denotes the addition of new lines of Improved Porcelain Plumbing Goods manufactured by us during the past two years. Having equipped our plant with the latest and most improved machinery and labor-saving devices, we are enabled to greatly reduce our prices on many of our baths and lavatories, making it possible to use solid porcelain ware in moderate priced as well as in the more expensive buildings.

Architects, the plumbing trade and its patrons are most cordially invited to call and inspect the goods on exhibition in our showroom, when seeking the latest and best to be secured in sanitary porcelain plumbing fixtures.

When ordering or specifying, be particular to give the catalogue name and plate numbers ; in so doing, errors and delays will be avoided.

All agreements are contingent upon strikes, accidents and other causes beyond our control. All claims for corrections, deductions and shortages must be made within ten days of receipt of goods.

Boxing and packing are charged at cost.

Prices subject to change without notice.

Respectfully yours,

THE MONUMENT POTTERY COMPANY.

If with nickel-plated combination basin faucet, as shown, add			4.50 (Eight)
If with nickel-plated outlet strainer and coupling, add			1.50 (Eight)

For prices of legs, see B-461.

"The Huron" has no overflow, consequently no stopper, but has cast brass outlet coupling. It is intended that persons using it should wash in running water. The combination faucet, as furnished above, is of the very best construction and permits regulating the temperature of the water to suit persons using it.

For factories, schools, etc., where it is necessary to put up a number of lavatories in a row, and all of the lavatories are used at the same time, it is desirable to supply them through one pipe controlled by a single valve, which can be turned on or off at will by the janitor or engineer. When so required, B-462 should be ordered with one opening only in centre of back for supply spout.

MONUMENT PORCELAIN
"SURGEONS LAVATORY."

DIMENSIONS :

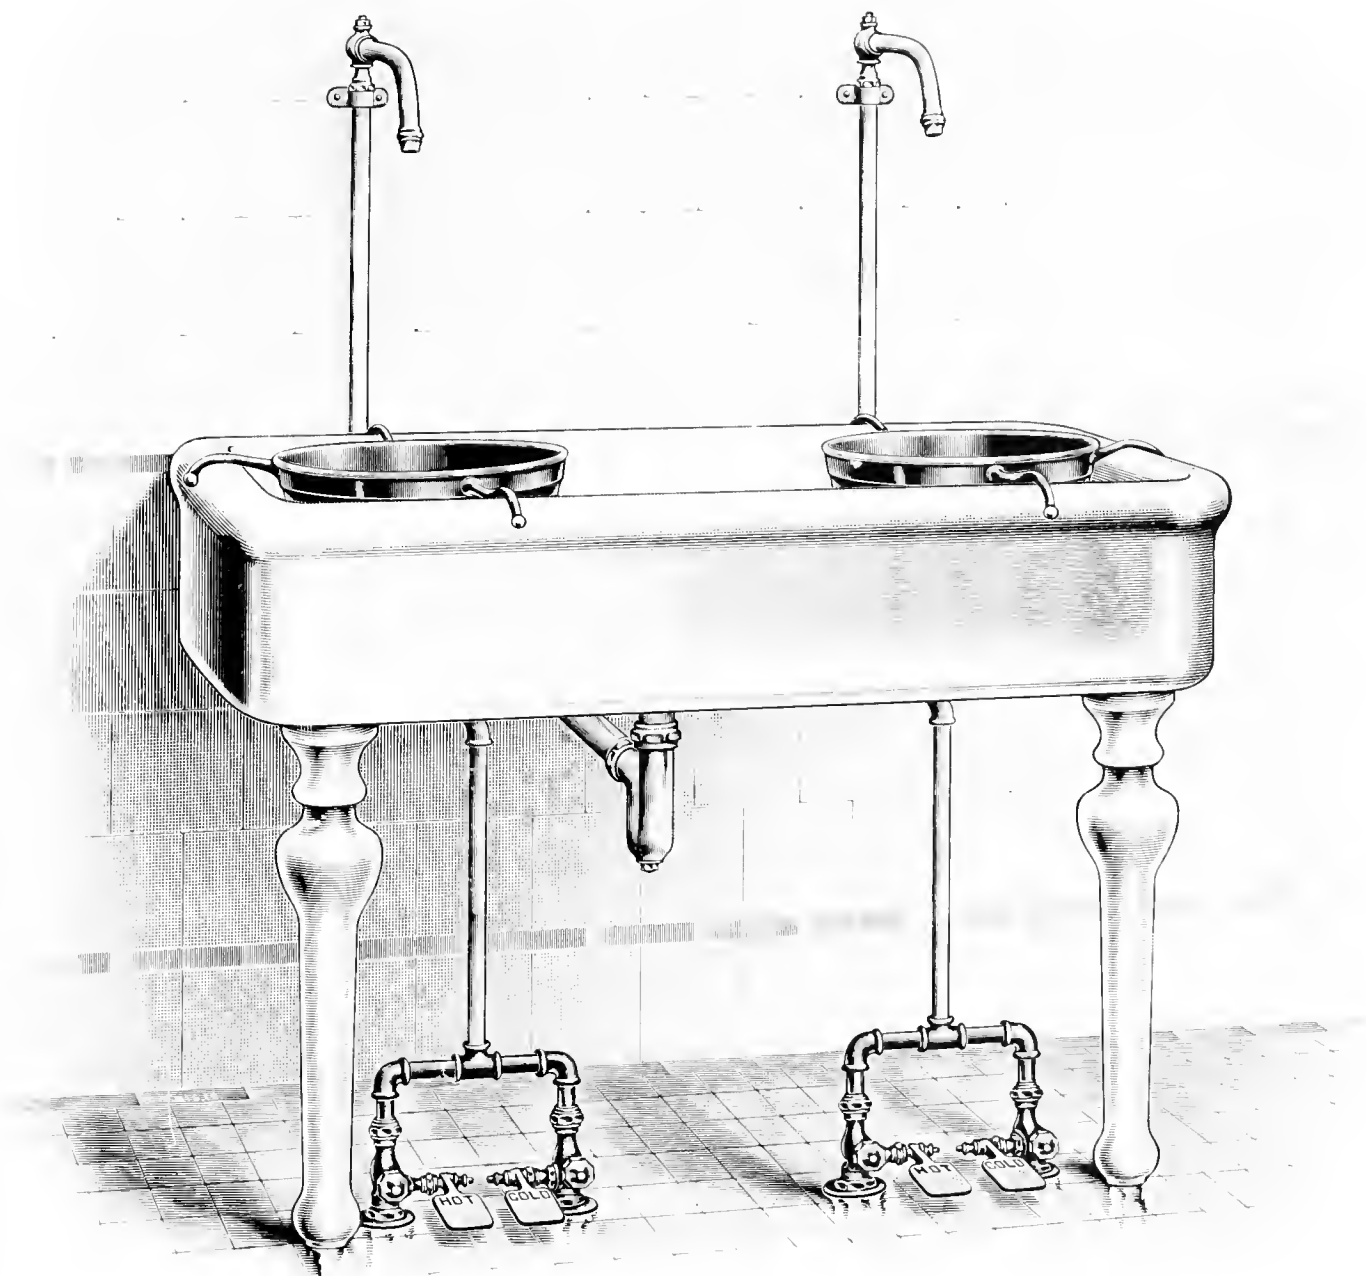

Length, 36 inches ; width, 24 inches ; bowl, 12½ inches by 16 inches.

	CLASS "A"	CLASS "B"
Price, lavatory only	\$40.00 (File)	\$28.00 (File)
If with porcelain enameled legs and nickel-plated brass adjustable wall supports, add		10.00 (File)
If with nickel-plated brass spout, cast brass trap, iron pipe size supply pipes and pedal supply for hot and cold water, as shown, add		30.00 (File)
If with additional pedal to operate waste, add		10.00 (File)

NOTE.—The instrument trays have small openings, so water can drain into basin. If it is necessary to place the lavatory away from wall, we can furnish a bronzed iron frame with four enameled iron legs or four cast brass legs. Price upon application.

"The Surgeons Lavatory" is intended for use in hospitals, medical institutions and universities, where the operator's hands must be kept antiseptic. The water supply of above is entirely controlled by foot power.

**MONUMENT PORCELAIN IMPROVED FLUSHING RIM CLINIC SLOP SINK
ON PORCELAIN TRAP STANDARD.**

	CLASS "A"	CLASS "B"
Price, sink and trap standard	\$52 00 (Elegist)	\$36 00 (Elegy)
If with cleansing jet, brass floor flange and bolts, No. 16 "Benthigh" standard copper-lined oak syphon tank with bent round corners, nickel-plated brass rod guide and china pull, nickel plated brass combination bracket, nickel-plated brass flush pipe, nickel-plated extra pattern compression double faucet for cleansing jet, with nickel-plated brass iron pipe size supply pipes to floor, as shown, add		\$55 00 (Element)

NOTE.—This sink can be furnished with pedal valve, as shown in B-510, instead of combination faucet, as shown, without additional cost.

The above apparatus is especially adapted for use in hospitals and operating rooms. The contents of receptacles are emptied into the slop hopper proper, which has a large opening into the trap. The inside surface of the pan or basin can be thoroughly washed out by placing it over the cleansing jet. The water supply to this jet (hot or cold) is controlled by the double combination faucet, so attendant can obtain hot, cold or temperate water. The whole interior of the surface of the slop sink and trap can be thoroughly cleansed and flushed by operating the syphon tank.
